

Vocabularies

Chailey Communication System

The CCS vocabulary was developed at the Chailey Heritage School in Sussex. The Vocabulary is structured into main categories accessible via the top page. Each category consists of a subcategory page below it (topics), followed by vocabulary items (keywords) accessible via the sub category page. The categories are also colour-coded to help recognition. CCS has recently been upgraded to include Colour PCS and colour Rebus. Grammar functions have been added to the verbs page and an environmental page has also been added. CCS is designed to be a vocabulary that grows with the user's ability and is therefore set up for each individual user. A book is available to accompany the vocabulary.
