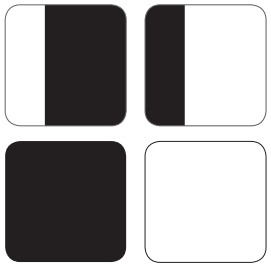
Mobi 2 & Tobii Eye-tracker

speak out and grow



Mobi 2 colour options

The perfect portable eye gaze solution. Combining the Tobii Eye-tracker unit with the Mobi 2 makes for a discrete, portable and wheelchair mountable eye gaze solution. The Eye-tracker is powered directly from the Mobi 2.

Fast and simple, one-time calibration.

Calibration of the Tobii Eye-tracker eye control unit, typically takes between 5-20 seconds to complete and automatically provides visual feedback on the quality of calibration. Furthermore, calibration is one-time, meaning you can turn off your computer or leave the eye control tracking unit without loosing your personal settings.

Bright & Dark Pupil tracking.

Advanced eye tracking technology ensures that over 95% of users will be able to eye control regardless of your eye color, lighting conditions, head movements, glasses or contact lenses.

A large track box.

With one of the largest track boxes on the market, Tobii Eye-tracker eye control unit supports a wide range of movement, including involuntary head movement without loosing accuracy, or interrupting the eye control (tracking) session.
