WordPower

WordPower software is a unique vocabulary design for AAC devices developed by Nancy Inman. WordPower for Mind Express combines the features of core vocabulary, spelling and word prediction. WordPower takes advantage of the fact that a core vocabulary of just 100 words accounts for approximately 50 per cent of words spoken. This powerful system facilitates fast and efficient communication for non-speaking individuals in a short period of time. Versions include text-based WordPower, and text and picture-based Picture WordPower.
